

Overview

Costa Rica's civil law traditions require that certain contracts are executed before a notary public to be legal, binding and opposable by third parties. To ensure the safety, security and success of your business, work with the nation's leading notary services team at Dentons Muñoz.

Our notaries are registered with the National Notary Authority (Dirección Nacional de Notariado) and complement the many legal services we provide our clients. Together, our lawyers and notaries provide necessary support and advice on public deeds, sworn statements, notarial certificates, certified documents, apostille certification and legalization of signatures.

We seamlessly validate contracts and legal documents with state-of-the-art technology, experienced personnel, high production capacity and prices established by law. Every document is managed expeditiously to fulfill all legal requirements for the legal security of our clients. Our personalized service enables our team to identify registration challenges for client titles or procedures, thereby minimizing client risk and legal exposure.
